

Preparing Your Glass Jars

Please follow these steps and prepare your jars before the workshop:

1. Soak the labeled jar or bottle in hot water to help loosen the label.
2. If the label does not easily come off, use a brillo pad or steel wool pad and scrub the label off.
3. You may have to scrub a few times in order to remove all the sticky residue.
4. Once the label is removed and the jar/bottle is dry, wipe it down with rubbing alcohol as a final cleaning step.
5. Your jar is now ready to paint!

See you at the workshop!
